NON-PROFIT PARTNERSHIP AGREEMENT FOR BLOCKCHAIN TECHNOLOGIES

This business agreement is between **AP Asia Tech Co., LTD.** and **ZAVOD PREMIK**, Murska Sobota (*a non-profit Institute*).

AP Asia Tech Co., Ltd. is working with the Partner, (**ZAVOD PREMIK**, Murska Sobota, **Slovenia**) on joint initiatives in next-generation technologies; in particular triggered by mutual innovations and interests on the BitShares blockchain and its Graphene technology framework (MIT license).

THE TECHNOLOGY COMPANY - AP ASIA TECH CO LTD

AP Asia Tech Co., Ltd has established since 2014 an IT services and solutions consulting practice, in early 2017 launching Blockchain Innovations. Many technologies are open source or belonging to public communities, and should be free from commercial interference. As a for-profit company, in order to work directly at the source, community, infrastructure (especially in the case of a DAC), outside of commercial project interests, determines we must seek a non-profit institute or foundation through which to make our contributions, that protects the interests of the blockchain or its community in remaining free and open. In summary, collaboration and partnership with Zavod Premik, Murska Sobota is to provide preferable IT management services in return for further assistance as detailed in the following information.

THE NON-PROFIT - THE INSTITUTE FOR YOUTH DEVELOPMENT 'ZAVOD PREMIK'

ZAVOD PREMIK, Murska Sobota is a **non-profit** Institution whose main activity is entrepreneurial and business consulting. Profit from the activity is intended exclusively for the further development of the organization's activities and the training of young people.

Zavod Premik do engage in investments, whereby as a non-profit the returns are kept within the institution, to keep it self-funding. They have invested both in AP Asia Tech to undertake blockchain and BitShares related work, and donated server in hosting center with legal correspondence and government level approval for crypto projects in Slovenia; with full plans to expand with other of the Balkan and Eastern Europe nations. Further they have made part of institute work now dedicated to legal and regulatory framework for cryptocurrency and blockchain.

AP Asia Tech role is to provide IT management and support, along with consultation on any technology matters. AP Asia Tech provides Zavod Premik with technological innovations to further the aims of the non-profit institution. AP Asia Tech are responsible to provide services to the blockchain that are being donated by the foundation itself.

CONCLUSION – BENEFITS AND RATIONALE

In seeking a non-profit to collaborate with in such a way, AP Asia Tech gains the years of existing and established legal frameworks, lawyers, academics and overall benefits which only further boost the underlying eco-system, bringing actual value to the BitShares blockchain and its community. Zavod Premik gains our IT administration and management resources to support their activities.

Being non-commercial agreement, we are thus working as a **charity which also places the technology in the category of public domain usage, not liable to local governmental or regulatory scrutiny and neither can it be placed as a security.**

By having an agreement with the non-profit, AP Asia Tech can work together, share knowledge, and influence or be spokespeople for legal and regulatory frameworks and status in other countries, apply and ensure

passing for listings on exchanges, and where establishing them with a non-profit institution is of benefit to satisfy international government or regulatory bodies and future plans desirable to establishing a charitable organization.
